PostDoc Position in Computational Neuroscience

Applications are invited for a Postdoctoral Position to use computational tools to study the neuronal circuits and mechanisms that give rise to epilepsy. The candidate will work together with Stan Anderson and Gabriel Kreiman. We are looking for an innovative researcher with a strong quantitative background, mathematical and computational skills and experience in Neuroscience research.

Please submit your application including CV, list of publications and names of three possible referees to:

Stan Anderson (wsanderson@partners.org)

or

Gabriel Kreiman (gabriel.kreiman@tch.harvard.edu)
