PostDoc Position in Computational Neuroscience

Applications are invited for a Postdoctoral Position in Computational and Theoretical Neuroscience in the Kreiman lab. We are looking for an innovative and enthusiastic researcher with a strong quantitative background (e.g. Math, Physics, Engineering, Computer Science) and experience in Neuroscience research. The post-doc will work in a collaborative and strong academic environment within the Harvard Medical School community. The research efforts will involve theoretical, computational and quantitative studies of visual recognition and learning in neuronal circuits.

To be considered for this position please submit your application including
- CV
- list of publications
- names of three people that are familiar with your work
